Enhance your windows with our unlimited choice of interior and exterior paint colors.

Whether you are upgrading existing windows in your home, renovating, or building a new home, SUPERVISION offers a complete line of custom-made windows designed to provide optimum functionality coupled with beauty and comfort for years to come!

All SUPERVISION window products are made from uPVC vinyl. Unlike other materials, uPVC vinyl is virtually maintenance-free. It requires no painting and is energy efficient, protecting your home against any kind of weather. But true beauty is more than skin deep. Inside each SUPERVISION window you’ll find a variety of innovative features that provide a perfect blend of form and function.

Multichamber frames improve thermal efficiency, while reducing uncontrolled expansion and contraction. A pressure-equalized drainage system channels water away from the interior of the window. Fusion welding of the mitered corners adds strength and stability and ensures an airtight seal. All windows are also engineered to reduce outside noise, making your home a more peaceful place to live.

Our access to cutting-edge technology also means we guarantee that you’ll be satisfied with your windows and their optimal, maintenance-free performance for years to come.

---

**CASEMENT & AWNING**

Distinctively elegant, these windows combine handsome good looks with the advantages of today’s technologies. Made from high grade uPVC, they are durable, solid, and maintenance-free.

**PS-3000**

**Casement Windows with maximum light area**

SUPERVISION introduces a new age of enlightenment. The superior glass area of PS window means you can enjoy the view without compromising on durability or energy-saving performance.

- Structural frame of 5 3/4” made of PVC feature slim sashes for maximum glass space.
- Exterior moulding is integrated into the frame to ensure watertightness and to enhance appearance without extra cost.
- The wide variety of grille patterns and styles offers design flexibility.
- Assorted architectural shapes are available—limited only by your imagination.
- Optional energy-saving double glazing with low-e allows the PS window to meet the ENERGY STAR norm.
- Sturdy multi-point locking hardware ensures maximum security.

Sash opens 90° to allow cleaning from inside the house.

---

**AL-3000**

**Classic Casement Windows**

Along with their classic good looks, functionality, and energy efficiency, AL-3000 windows feature the top aesthetic and technical qualities to enhance the beauty of your home in a more traditional way.

- Structural frames of 3 1/4” or 4 1/2” with classic style sash and a wide variety of rounded mouldings.
- Available with energy-saving double or triple glazing with Low-E allows the AL-3000 window to meet the ENERGY STAR norm.

Sash opens 90° to allow cleaning from inside the house.
Hung Window
Single VI-3000 and Double AS-3000
- Models VI-3000 and AS-3000 have 3 1/4” frames and can be accessorized with a wide range of brick moulds to harmonize with the style of your home.
- Choose from a wide variety of grille patterns and styles.
- Optional energy-saving double glazing with Low-E allows the LS window to meet the ENERGY STAR norm.
- Practical tilting sash system allows cleaning from inside the house.
- Cam locks provide maximum security while triple weatherstripping keeps drafts and moisture out.

Horizontal Sliding Window
Single PR-3000 and Double BE-3000
- Models PR-3000 and BE-3000 have 3 1/4” frames and can be accessorized with a wide range of brick mould to harmonize with the style of your home.
- Choose from a wide variety of grille patterns and styles.
- Optional energy-saving double glazing with Low-E allows the PR and BE windows to meet the ENERGY STAR norm.
- Practical removable sash system for single sliders (PR-3000) or tilting system for double sliders (BE-3000) allow cleaning from inside the house.

HUNG AND HORIZONTAL SLIDERS
Functional, durable SUPERVISION hung and horizontal sliders are designed to light up your life—with the most light possible. These windows will make a handsome addition to your home with their superior quality and easy-to-clean sashes that lift (hung) or pivot (double horizontal sliders).
PATIO DOOR

- SUPERVISION ET-3000 patio doors feature rigid wood frames with uPVC cladding and aluminum-reinforced solid uPVC panels, fusion welded for superior solidity and insulation.
- Available mouldings complement SUPERVISION windows.
- A wide variety of grille patterns and styles is available.
- Optional energy-saving double glazing with Low-E allows the ET patio doors to meet the ENERGY STAR norm.
- For maximum security, ET-3000 patio doors can be equipped with optional toe-lock systems and security bars.

20 optional colors available with the possibility of matching any other color sample, check an in-store color chart.

** Meeting “ENERGY STAR” qualification in your climate zone requires you to choose the appropriate product and glass options. Windows rated for cooler climate zones also meet the zones that are warmer. For example, a “C” rated window also qualifies for zones “A” and “B.”

OUR NEW COLLECTION....
OF LOW-E THERMAL UNITS!

LIFETIME WARRANTY – STAR+

This Low-E thermal unit was designed to maximize the performance of our windows while providing maximum energy efficiency under the Energy Star program, leading to lower energy consumption for Canadian homeowners when choosing these windows.

LIFETIME WARRANTY – R+

Triple glazed Low-E glass unit offered as an option in AL-3000 casement windows will provide outstanding energy saving performance. R+ enable the triple glazed AL-3000 to meet the Zone D requirements, the highest Energy Star rating, in Canada.

WARRANTY 15 YEARS – R+

This Low-E thermal unit maximises R value while minimising solar gain for your clients looking to buy windows with the highest R rating.

Sometimes it’s what you don’t see that makes all the difference. Inside the glazing units of each window and door is a hidden benefit.

Investing in superior windows and doors pays off down the road in lower energy bills, furniture and carpet not faded by ultraviolet light, and a home that’s comfortable year round.

SOUND-BLOCKING GLASS

Country living, even in the noisy city!

Does your world seem to get noisier every day? Sereni-T glass substantially reduces undesirable noise from the outside particularly for houses or buildings in close proximity to areas of high traffic, industry, airports and other sources of noise. Sereni-T glass increases a window’s STC rating, and reduces undesirable noises coming from the outside.

Properties of Sereni-T

Sereni-T is made up of two glass panes: one of 6 mm thick and one of 3 mm thick. The Sereni-T Plus is made up of two glass panes: a double pane (two glasses of 3 mm thick each) held in place by an interlayer, for a total thickness of 6 mm, and a second pane of 3 mm thick.

RESISTANT GLASS

SOLIDI-T: greater resistance, greater security

Solidi-T glass is heated to temperatures of about 700 degrees Celsius, then rapidly air-cooled, creating a compression layer that makes 4 times more resistant than regular glass. Tempered glass is extremely resistant but can still break under powerful impact. Broken Solidi-T glass shatters into many small, rounded, dull pieces, greatly reducing the risk of cuts.

Solidi-T Plus: the ultimate name in safety glass

Safety is everyone’s concern, and Solidi-T Plus provides complete peace of mind. Precaution is the key to safe-guarding your home and protecting your loved ones, either from theft or from inclement weather. Laminated Solidi-T Plus is specially designed to withstand severe winds and to resist forces of impact. In the event that the glass does break, the laminated interlayer holds the glass together, greatly reducing the likelihood of personal injury.

FOR MORE THAN 30 YEARS...

SUPERVISION has pursued an ideal of excellence and innovation that has been the foundation of its reputation. When you choose a SUPERVISION door or window, you are enjoying the result of 60 years of know-how, expertise and design: an aesthetic and modern design product that conforms to the highest quality standards along with one of the best warranties on the market and an outstanding after-sales service.

20-YEARS WARRANTY – VINYL

SUPERVISION markets products that meet the highest quality standards. That is why we can offer one of the best warranties in the industry: a 20-Year Limited Warranty on all the vinyl components and a 5-Year Limited Warranty on all the wood components and aluminum cladding.

ENERGY STAR

ENERGY STAR® qualified windows and patio doors will save you money by reducing your energy costs up to 12 percent. These products will also keep your home more comfortable all year-round, reduce outside noise, and, depending on the amount of humidity in your home, reduce condensation in cold weather.

Let the sun and the rain clean your windows! Luminoxi-T uses the sun’s rays to loosen dirt, which then easily washes away in the rain practically without a trace. Luminoxi-T makes windows easier to clean, and helps them to stay cleaner longer. Luminoxi-T + sun + rain = clean windows without all the hard work! And that’s not all: Luminoxi-T is combined with energy efficient glass, helping homes stay warmer in winter and cooler in summer.

SELF-CLEANING GLASS
